Messaging solutions

A global, simple and mobile technology. SMS not only for simple texting, but for mobile marketing campaigns, two-factor authentication codes...

We cover more than 1,500 international network operators.

SMS (final customer)

Send text messages to mobile phones.

Mobile Outbound

SMS with global coverage. Select the quality of the route.

MNP

Database daily update.

Smart Route

Choose the destination operators to which traffic is sent, blocking or returning the rest.

MMS

Send multimedia content to mobile phones.

Mobile Inbound

Incoming SMS with international allocated long and short codes.

HLR

Check the operator of the telephone number and its status on the network.

Operators

Trapdoor Crawler

A2P Monetization service. Find out where your SMS messages come from and improve your network security.

HUB (P2P)

Services in collaboration with other operators, offering a global interconnection network.

Registered Services License

The operator license is meant to get Lleida.net white label certification services.

Twin

Access our comprehensive, instant and two-way coverage. As if you had a dual SIM.

eKYC services and data validation

Services developed to optimize onboarding and communication processes. Validate customer identity, documents, phone numbers and email addresses.

eKYC

eKYC Docs

Validate ID's, passports and driving licenses.

eKYC OCR

Convert scanned ID images to text.

eKYC Photo

Boost eKYC docs by adding biometric facial recognition.

eKYC Video

In person validation via video call.

eKYC Onboarding

End-to-end solution for efficient workflow.

Phone number and email validation

Check All

Check the operator of the telephone number and its status on the network.

Phone Alert

Number availability service alert.

Check Network

Check which network the number belongs to.

Email Checker

Verify the operability of email addresses.
